Planetary and Space Science

Volume Contents for Volume 45 (1997)

VOLUME CONTENTS

JANUARY

Special Issue: MERCURY: THE PLANET AND ITS MAGNETOSPHERE

Balogh, A.	**Introduction. Mercury: the Planet and its Magnetosphere 1**
Thomas, P. G.	**Are there other tectonics than tidal despinning, global contraction and Caloris related events on Mercury? A review of questions and problems 3**
Wu, X., Bender, P. L., Peale, S. J., Rosborough, G. W., Vincent, M. A.	**Determination of Mercury's 88 day libration and fluid core size from orbit 15**
Anderson, J. D., Turyshev, S. G., Asmar, S. W., Bird, M. K., Konopliv, A. S., Krisher, T. P., Lau, E. L., Schubert, G., Sjogren, W. L.	**Radio-science investigation on a Mercury Orbiter mission 21**
Langevin, Y.	**The regolith of Mercury: present knowledge and implications for the Mercury Orbiter mission 31**
Brückner, J., Masarik, J.	**Planetary gamma-ray spectroscopy of the surface of Mercury 39**
Schmidt, W. K. H.	**Imaging Mercury's surface within the context of the Mercury Orbiter study of 1994 49**
Clark, P. E., Trombka, J. I.	**Remote X-ray fluorescence experiments for future missions to Mercury 57**
Grard, R.	**Photoemission on the surface of Mercury and related electrical phenomena 67**
Lammer, H., Bauer, S. J.	**Mercury's exosphere: origin of surface sputtering and implications 73**
Morgan, T. H., Killen, R. M.	**A non-stoichiometric model of the composition of the atmospheres of Mercury and the Moon 81**
Potter, A. E., Morgan, T. H.	**Sodium and potassium atmospheres of Mercury 95**
Slater, D. C., Morgan, T. H., Stern, S. A.	**Modern lightweight UV spectrographs for *in situ* studies of the exosphere and photo-ion population about Mercury 101**
Southwood, D. J.	**The magnetic field of Mercury 113**
Glassmeier, K.-H.	**The Hermean magnetosphere and its ionosphere–magnetosphere coupling 119**
Engle, I. M.	**Mercury's magnetosphere: another look 127**
Slavin, J. A., Owen, J. C. J., Connerney, J. E. P., Christon, S. P.	**Mariner 10 observations of field-aligned currents at Mercury 133**

Blomberg, L. G. — **Mercury's magnetosphere, exosphere and surface: low-frequency field and wave measurements as a diagnostic tool 143**

Torkar, K., Fehringer, M., Rüdenauer, F., Grard, R. J. L., Riedler, W. — **Necessity and feasibility of spacecraft potential control in the Hermean magnetosphere 149**

Roux, A., Cornilleau-Wehrlin, N., Meyer, A., Rezeau, L. — **Measurements of a.c. magnetic fields and currents in the Hermean magnetosphere 163**

McKenna-Lawlor, S. M. P. — **Characteristic boundaries of the Hermean magnetosphere and energetic particles close to the planet 167**

FEBRUARY

Parisi, M. G., Brunini, A. — **Constraints to Uranus' Great Collision—II 181**

Ferri, F., Rotundi, A., Farrelly, F. A., Fulchignoni, M. — **A planetary atmosphere simulator: application to Titan 189**

Keller, A. E., Gurnett, D. A., Kurth, W. S., Yuan, Y., Bhattacharjee, A. — **Lower hybrid waves generated in the wake of the Galileo spacecraft 201**

Oberc, P. — **Electrostatic and rotational ejection of dust particles from a disintegrating cometary aggregate 221**

Gil-Hutton, R. — **The number of objects in the original asteroid belt 229**

Menichella, M. — **Did a discrete asteroid breakup event affect Gaspra's cratering record? 235**

Tsirulnik, L. B., Kuznetsova, T. V., Oraevsky, V. N. — **Spectral method of global minimum (MGM) and its application to problems of heliospheric and planetary physics 241**

El-Zein, Y., Yi, S., Lonngren, K. E. — **Expansion of a dusty plasma into a vacuum: effects of charge nonneutrality 251**

Song, P., Zhang, X. X., Paschmann, G. — **Uncertainties in plasma measurements: effects of lower cutoff energy and spacecraft charge 255**

Klimushkin, Dm. Yu. — **Spatial structure of transversally small-scale hydromagnetic waves in a plane finite-β model magnetosphere 269**

MARCH

Wuttke, M. W., Keller, H. U., Markiewicz, W. J., Petrova, E., Richter, K., Thomas, N. — **Properties of dust in the Mars atmosphere: a revised analysis of Phobos/KRFM data 281**

Detrick, D. L., Rosenberg, T. J., Fry, C. D. — **Analysis of the Martian atmosphere for riometry 289**

Thomas, N., Fitzsimmons, A., Ip, W.-H. **The thermal emission of Kuiper Belt objects 295**

Nemtchinov, I. V., Shuvalov, V. V., Kosarev, I. B., Artem'eva, N. A., Trubetskaya, I. A., Svetsov, V. V., Ivanov, B. A., Loseva, T. V., Neukum, G., Hahn, G., Niem, D. de **Assessment of comet Shoemaker–Levy 9 fragment sizes using light curves measured by Galileo spacecraft instruments 311**

Steel, D. I. **On the orbital similarity of Earth-crossing asteroids (2101) Adonis and 1995 CS 327**

Marzari, F., Scholl, H., Tomasella, L., Vanzani, V. **Gas drag effects on planetesimals in the 2:1 resonance with proto-Jupiter 337**

Grayzeck Jr, E. J., A'Hearn, M. F., Klinglesmith III, D. A. **Addition of spacecraft data to the IHW Comet Halley CD-ROM archive 345**

Vidhya Lakshmi, S., Bharuthram, R., Rao, N. N., Shukla, P. K. **Kinetic theory of nonlinear dust-acoustic waves in a dusty plasma 355**

Sazhin, S. S., Serikov, V. V. **Rarefied gas flows: hydrodynamic versus Monte Carlo modelling 361**

Titov, D. V., Haus, R. **A fast and accurate method of calculation of gaseous transmission functions in planetary atmospheres 369**

Bharuthram, R. **Low frequency electrostatic instabilities in a dusty plasma driven by crossfield beams 379**

Oznovich, I., Walterscheid, R. L., Sivjee, G. G., McEwen, D. J. **On Krassovsky's ratio for ter-diurnal hydroxyl oscillations in the winter polar mesopause 385**

Schröder, W. **Some aspects of the earlier history of solar–terrestrial physics 395**

APRIL

Zharkov, V. N., Gudkova, T. V. **On the dissipative factor of the Martian interiors 401**

Palomba, E., Colangeli, L., Formisano, V., Piccioni, G., Cafaro, N., Moroz, V. **The spectroscopic performances of the Planetary Fourier Spectrometer for the Mars '96 mission 409**

Vokrouhlický, D., Farinella, P. **Thermal force effects on slowly rotating, spherical artificial satellites—II. Earth infrared heating 419**

Ignatiev, N. I., Moroz, V. I., Moshkin, B. E., Ekonomov, A. P., Gnedykh, V. I., Grigoriev, A. V., Khatuntsev, I. V. **Water vapour in the lower atmosphere of Venus: a new analysis of optical spectra measured by entry probes 427**

Skoglöv, E. **Evolution of the obliquities for nine near-Earth asteroids 439**

Meuris, P., Verheest, F., Lakhina, G. S. **Influence of dust mass distributions on generalized Jeans–Buneman instabilities in dusty plasmas 449**

Singh, P. D., Huebner, W. F., Costa, R. D. D., Landaberry, S. J. C., Freitas Pacheco, J. A. de — **Gas and dust release rates and color of dust in comets P/Halley (1986 III), P/Giacobini–Zinner (1985 XIII), and P/Hartley–Good (1985 XVII) 455**

Li, J.-C., Jenniskens, P. — **Inelastic neutron scattering study of high density amorphous water ice 469**

Shiah, A., Hwang, K. S., Wu, S. T., Stone, N. H. — **Three-dimensional simulation of current collection in space 475**

Rezeau, L., Cornilleau-Wehrlin, N., Belmont, G., Canu, P., Prangé, R., Balogh, A., Forsyth, R. J. — **Possible role of electromagnetic low frequency waves in the Io torus in the production of Jovian aurorae 483**

Min, K. W., Kim, T., Lee, H. — **Effects of magnetic reconnection in the Kelvin–Helmholtz instability at the magnetospheric boundary 495**

Letter
Ifedili, S. O. — **Forbush decreases in the cosmic radiation: measurement of the extent of the modulating region 511**

Book Review
Carusi, A. — **Asteroid: Earth Destroyer or New Frontier? by Patricia Barnes–Svarney 515**

MAY

Special Issue: ASTEROIDS, COMETS, METEORS 1996—I

Lipschutz, M. E., Wolf, S. F., Dodd, R. T. — **Meteoroid streams as sources for meteorite falls: a status report 517**

Šimek, M., Pecina, P. — **Particle mass distribution in the new Perseid 1987–1994 filament 525**

Šimek, M. — **A note on the meteoric head echo occurrence 529**

Tozzi, G. P., Cimatti, A., Serego Alighieri, S. di, Cellino, A. — **Imaging polarimetry of comet C/1996 B2 (Hyakutake) at the perigee 535**

Spurný, P. — **Exceptional fireballs photographed in central Europe during the period 1993–1996 541**

Svoreň, J., Neslušan, L., Porubčan, V. — **Determination of the period of activity of meteoroid streams 557**

Borovička, J., Betlem, H. — **Spectral analysis of two Perseid meteors 563**

Baggaley, W. J., Bennett, R. G. T., Taylor, A. D. — **Radar meteor atmospheric speeds determined from echo profile measurements 577**

Rendtel, J., Brown, P. — **Visual observations of the Perseid meteor shower 1988–1994 585**

Hills, J. G., Goda, M. P. — **Meteoroids captured into Earth orbit by grazing atmospheric encounters 595**

Zvolánková, J., Pittich, E. M. **Activity of the Lyrid meteor shower in the years 1945–1952 603**

Harris, A. W., Lemme, C., Gerdes, E. M., Wiedemann, K., Neukum, G. **First results of the DLR planetary radar initiative 607**

JUNE

Guez, L., Bruston, P., Raulin, F., Régnaut, C. **Importance of phase changes in Titan's lower atmosphere. Tools for the study of nucleation 611**

Griv, E., Yuan, C., Chiueh, T. **Resonant excitation of density waves in Saturn's rings: the effect of spatial inhomogeneity 627**

Titov, D. V., Moroz, V. I., Gektin, Yu. M. **Aerosol component of the Martian atmosphere and its variability from the results of infrared radiometry in the Termoscan/Phobos-2 experiment 637**

Mautner, M. N. **Biological potential of extraterrestrial materials—1. Nutrients in carbonaceous meteorites, and effects on biological growth 653**

Kührt, E., Knollenberg, J., Keller, H. U. **Physical risks of landing on a cometary nucleus 665**

Almeida, A. A. de, Singh, P. D., Huebner, W. F. **Water release rates, active areas, and minimum nuclear radius derived from visual magnitudes of comets—an application to comet 46P/Wirtanen 681**

Zilbersher, D., Gedalin, M. **Pickup ion dynamics at the structured quasi-perpendicular shock 693**

Šuráň, J. **A calendar for Mars 705**

Special Section: COMET HYAKUTAKE

Womack, M., Stern, S. A., Festou, M. C. **Millimeter-wavelength spectroscopy of CO, HCN, H_2CO, and CH_3OH in C/1996 B2 (Hyakutake) 711**

Woodney, L. M., McMullin, J., A'Hearn, M. F. **Detection of OCS in comet Hyakutake (C/1996 B2) 717**

Sorkhabi, O., Blunt, V. M., Lin, H., A'Hearn, M. F., Weaver, H. A., Arpigny, C., Jackson, W. M. **Using photochemistry to explain the formation and observation of C_2 in comets 721**

Pater, I. de, Snyder, L. E., Mehringer, D. M., Wright, M., Veal, J. M., Fernández, Y. R., Palmer, P., A'Hearn, M. F. **BIMA array observations of comet Hyakutake: upper limit to the 2.7 mm continuum emission 731**

Fernández, Y. R., Kundu, A., Lisse, C. M., A'Hearn, M. F. **X-Band VLA observations of comet Hyakutake (C/1996 B2) and implications for nuclear properties 735**

Letters

Molin, G., Fioretti, A. M., Cevolani, G., Carampin, R., Serra, R. **A new fall in Italy: the Fermo H-chondrite breccia. A preliminary investigation 743**

Russell, C. T., Mulligan, T., Delva, M., Zhang, T. L., Schwingenschuh, K.
Reply to "Comment on 'A simple test of the induced nature of the Martian tail' by C. T. Russell *et al.*" by P. L. Israelevich 749

JULY

Special Issue: ASTEROIDS, COMETS, METEORS 1996—II

Kristensen, L. K., Dohrup, P.
The amplitude–phase relationship revisited 751

Doressoundiram, A., Paolicchi P., Verlicchi, A., Cellino A.
The formation of binary asteroids as outcomes of catastrophic collisions 757

Zaitsev, A. L., Ostro, S. J., Ignatov, S. P., Yeomans, D. K., Petrenko, A. G., Choate, D., Margorin, O. K., Cormier, R. A., Mardyshkin, V. V., Winkler, R., Rghiga, O. N., Jurgens, R. F., Shubin, V. A., Giorgini, J. D., Krivtsov, A. P., Rosema, K. D., Koluka, Y. F., Slade, M. A., Gavrik, A. L., Andreev, V. B., Ivanov, D. V., Peshin, P. S., Koyama, Y., Yoshikava, M., Nakamura, A.
Intercontinental bistatic radar observations of 6489 Golevka (1991 JX) 771

Dell'Oro, A., Paolicchi, P.
A new way to estimate the distribution of encounter velocity among the asteroids 779

Lopez Garcia, A., Yagudin, L. I., Martinez Uso, M. J.
GSC+: software for transferring the Guide Star Catalogue on the FK5 system 785

Pittichová, J.
On the rotation of the IRAS–Araki–Alcock nucleus 791

Svoreň, J.
Brightness of long-period comets observed at large heliocentric distances—I. The computer catalogue for 1861–1941 795

Rauer, H., Biver, N., Crovisier, J., Bockelée–Morvan, D., Colom, P., Despois, D., Ip, W.-H., Jorda, L., Lellouch, E., Paubert, G., Thomas, N.
Millimetric and optical observations of Chiron 799

Neslušan, L.
On the relatively high concentration of the directions of long-period comet perihelion points in the North Pole region 807

Brandt, J. C., Yi, Y., Petersen, C. C., Snow, M.
Comet de Vico (122P) and latitude variations of plasma phenomena 813

Cartwright, I. M., Fitzsimmons, A., Williams, I. P., Kemp, S. N.
CCD photometry of comet 46P/Wirtanen 821

Sirono, S., Yamamoto, T.
Thermal conductivity of granular materials relevant to the thermal evolution of cometary nuclei 827

Brucato, J. R., Castorina, A. C., Palumbo, M. E., Satorre, M. A., Strazzulla, G. — **Ion irradiation and extended CO emission in cometary comae 835**

Donnison, J. R., Pettit, L. I. — **A Bayesian approach to trends in cometary magnitude data 841**

Smirnov, V. A. — **Methods of nonradiating meteor mass calculation 847**

Betlem, H., ter Kuile, C., van't Leven, J., de Lignie, M., Bellot, L. R., Koop, M., Angelo, C., Wilson, M., Jenniskens, P. — **Precisely reduced meteoroid trajectories and orbits from the 1995 Leonid meteor outburst 853**

Molau, S., Arlt, R. — **Meteor shower radiant positions and structures as determined from single station video observations 857**

Baggaley, W. J., Galligan, D. P. — **Cluster analysis of the meteoroid orbit population 865**

Popel, S. I. — **Electromagnetic effects in Earth's ionosphere and magnetosphere caused by a cosmic body 869**

Rocher, P., Chapront, J. — **Compact ephemerides for minor planets 877**

Froeschlé, Cl., Gonczi, R., Lega, E. — **The fast Lyapunov indicator: a simple tool to detect weak chaos. Application to the structure of the main asteroidal belt 881**

AUGUST

Special Issue: NEWS FROM TITAN

Sagan, C. — **Titan in 2097 887**

Cravens, T. E., Keller, C. N., Ray, B. — **Photochemical sources of non-thermal neutrals for the exosphere of Titan 889**

Anicich, V. G., McEwan, M. J. — **Ion–molecule chemistry in Titan's ionosphere 897**

Elperin, T., Kleeorin, N., Podolak, M., Rogachevskii, I. — **A mechanism for the formation of aerosol concentrations in the atmosphere of Titan 923**

Kostiuk, T., Fast, K., Livengood, T. A., Goldstein, J., Hewagama, T., Buhl, D., Espenak, F., Ho Ro, K. — **Ethane abundance on Titan 931**

Samuelson, R. E., Mayo, L. A., Knuckles, M. A., Khanna, R. J. — **C_4N_2 in Titan's north polar stratosphere 941**

Samuelson, R. E., Mayo, L. A. — **Steady-state model for methane condensation in Titan's troposphere 949**

Samuelson, R. E., Nath, N. R., Borysow, A. — **Gaseous abundances and methane supersaturation in Titan's troposphere 959**

Lorenz, R. D., Lunine, J. I. — **Titan's surface reviewed: the nature of bright and dark terrain 981**

Ivanov, B. A., Basilevsky, A. T., Neukum, G. — **Atmospheric entry of large meteoroids: implication to Titan 993**

Lorenz, R. D. — **Impacts and cratering on Titan: a pre-Cassini view 1009**

Special Section: OUTER PLANETS

Vasyliūnas, V. M., Eviatar, A. — **Electron temperature profiles in the magnetosphere of Neptune 1023**

Roddier, F., Roddier, C., Brahic, A., Dumas, C., Graves, J. E., Northcott, M. J., Owen, T. — **First ground-based adaptive optics observations of Neptune and Proteus 1031**

Maran, M. D., Collander-Brown, S. J., Williams, I. P. — **Limitations on the existence of a tenth planet 1037**

Book Review
Ungaro, F. — **Satellite Control: A Comprehensive Approach by John T. Garner 1045**

Corrigendum 1047

Obituary 1049

SEPTEMBER

Ferrari, C., Brahic A. — **Arcs and clumps in the Encke division of Saturn's rings 1051**

Nyffenegger, P., Davis, D. M., Consolmagno SJ, G. J. — **Tectonic lineations and frictional faulting on a relatively simple body (Ariel) 1069**

Häberli, R. M., Reber, M. J., Bassi, M. L. — **Collection of interstellar gas on the Moon 1081**

Steel, D. I., McNaught, R. H., Garradd, G. J., Asher, D. J., Taylor, A. D. — **Near-Earth asteroid 1995 HM: a highly-elongated monolith rotating under tension? 1091**

Eggers, S., Keller, H. U., Kroupa, P., Markiewicz, W. J. — **Origin and dynamics of comets and star formation 1099**

Kirsch, E., Daly, P. W., McKenna-Lawlor, S., Neubauer, F. M., Coates, A. J. — **Observation of interplanetary particles in a corotating interaction region and of energetic water group ions from comet Grigg–Skjellerup 1105**

McKenna-Lawlor, S., Afonin, V. V., Kirsch, E., Daly, P. — **Characteristic boundary transitions in energetic particle data (60– ≥ 260 keV) recorded at comets P/Grigg–Skjellerup and P/Halley by the EPONA instrument on Giotto 1119**

Laxton, N. F., Balogh, A., Cowley, S. W. H., Dunlop, M. W., Forsyth, R. J., Hynds, R. J., Staines K. — **Origins of the first order anisotrophy of ~1 MeV protons in the Jovian magnetosphere during the Ulysses flyby: flux gradients and plasma flows 1143**

Meuris, P. — **The influence of a dust size distribution on the dust-acoustic mode 1171**

Book Review
Hegel, U. — **Advances in Space Biology and Medicine edited by Sjoerd L. Bonting 1175**

OCTOBER

Special Issue: THE SL9–JUPITER COLLISION

O. Funke, M. K. Bird, J. Neidhöfer, I. de Pater — **Effelsberg observations of the evolution of Jupiter's radio brightness during and after the impacts of comet Shoemaker–Levy 9 1177**

O. M. Stardubtseva, L. A. Akimov, V. V. Korokhin — **Temporal changes in the north–south asymmetry of polarized light of Jupiter may be associated with the comet SL9 visit to the Jovian system 1183**

Th. Encrenaz, P. Drossart, R. W. Carlson, G. Bjoraker — **Detection of H_2O in the splash phase of G- and R- impacts from NIMS-Galileo 1189**

P. H. M. Galopeau, E. Gerard, A. Lecacheux — **Modifications of the synchrotron radiation belts of Jupiter: evidence for natural variations in addition to SL9 effects 1197**

E. Lellouch, B. Bézard, R. Moreno, D. Bockelée-Morvan, P. Colom, J. Crovisier, M. Festou, D. Gautier, A. Marten, G. Paubert — **Carbon monoxide in Jupiter after the impact of comet Shoemaker–Levy 9 1203**

Y. Leblanc, R. J. Sault, G. A. Dulk — **Synthesis of magnetospheric radio emissions during and after the Jupiter/SL-9 collision 1213**

Ph. Galdemard, B. Mosser, P. O. Lagage, E. Pantin — **3-D analysis of the seismic response of Jupiter to the SL9 impacts: application to the CAMIRAS infrared images 1223**

G. A. Dulk, R. J. Sault, Y. Leblanc — **Jupiter's radiation belts: at the time of comet SL-9 and a year later 1231**

S. Miller, N. Achilleos, H. A. Lam, B. M. Dinelli, R. Prangé — **The impact of comet Shoemaker–Levy 9 on the jovian ionosphere and aurorae 1237**
